FAQ's

Q: Can I have multiple Backup Boxes ?

A: Yes. You can have an unlimited number of Backup Boxes, even if they are on the same network.

Q: Does Backup Box have Wi-Fi ?

A: You must connect your Backup Box to your network modem/router using the included ethernet cable. However, your devices can connect to your Backup Box using Wi-Fi.

COST SAVINGS

- Use a Backup Box to store all of your photos and files instead of Cloud Storage.
- A cost-effective, one-time purchase
- Faster than most Cloud Storage
- More capacity than Cloud Storage

How it works

1. Connect Backup Box to your internet modem / router with included ethernet cable and to power with the included USB-C power adapter

2. Connect your USBs or hard drives (^Max 1 Hard Drive, Max 4 USB's or SSD's).

There are:

Two USB3 Ports (Up to 1000mbps)

Two USB2 Ports (Up to 480mbps)

3. Access your USBs / hard drives from anywhere in the world through its built in VPN !

*The speed of your Backup Box via the VPN is determined by the UPLOAD speed of the network the Backup Box is connected to.
